Performance figures shown on this factsheet are net of underlying fund charges but gross of Brooks Macdonald and professional adviser management fees. Deduction of these fees will impact on the performance shown. Prior to July 2012, returns are representative performance data from DPZ Capital Limited* portfolios managed on the Skandia Investment Solutions platform. Please note that performance figures of less than one year are not annualised.

*Managed at the relevant time by DPZ Capital Limited, which merged with Brooks Macdonald on 02.12.15.

**Represents the ARC Cautious PCI GBP Index. Benchmarks are provided by Asset Risk Consultants. Returns for the last three months may represent estimates only.

Overview

A low-risk, defensive portfolio structured to provide wealth preservation and returns in excess of cash. The majority of investments will be in stable assets, such as cash and fixed interest securities, with some limited exposure to growth assets, such as equity and property. Equity exposure is expected to range between 10-30%. The recommended investment time frame for this strategy is in excess of three years. Long-term returns are targeted to beat inflation.

Important information

All data provided by Brooks Macdonald, unless otherwise stated, as at 30.06.2020. The information presented in this factsheet, including charges and performance, is for the Sterling portfolio. Other currencies may be available. Investment markets and conditions can change rapidly and as such the views expressed should not be taken as statements of fact, nor should reliance be placed on these views when making investment decisions. The price of assets in this portfolio and the income from them can go down as well as up and neither is guaranteed. Past performance is not a guide to the future. Investors may not get back the amount invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. Changes in interest rates may impact the value of fixed interest investments within the portfolio. The value of your investment may be impacted if underlying fixed interest holdings default, or market perception of their credit risk changes.
