Investment objective

This portfolio aims to produce a balance between capital appreciation and income over a typical investment cycle (i.e. 7-10 years) using investments that consider environmental, social and governance criteria alongside traditional financial metrics. An active screening approach is used to select potential portfolio allocations. This portfolio will have exposure to funds that focus on ESG factors (including resource efficiency, employee engagement and business culture), as well as focused thematic investments, such as environmental technology, and those that have measurable impact, such as social housing. The volatility profile could therefore differ from a traditional discretionary portfolio with the same asset allocation.

Performance since inception (30/09/2017)

Discrete performance (%)

Total return to end of last calendar quarter 31/12/2020.

	2020	2019	2018
Model	+21.5	+16.8	-3.3
Benchmark	+1.9	+16.2	-4.8

Cumulative performance (%)

Total return from inception to 31/12/2020.

	3 Months	1 Year	3 Years	Inception (30/09/2017)
Model	+10.2	+21.5	+37.2	+41.2
Benchmark	+7.4	+1.9	+12.8	+17.3

Risk & return since inception (%)

	Model	Benchmark (PIMFA Balanced Portfolio Total Return)
Annualised volatility	+9.5	+10.7
Maximum loss	-10.6	-14.7
Sharpe ratio	+4.3	+1.6

Annualised volatility: risk is measured by the variability of performance. The higher the standard deviation, the greater the variability (and therefore the risk) of the Fund or the index.

Sharpe ratio: measures the risk/return trade-off. It is the annualised return less the average risk-free rate, divided by the annualised volatility of the model.

Portfolio Manager commentary

While these portfolios are about both positive change and positive performance, we were pleased to observe another very strong quarter of returns for our ESG portfolios. The strategies substantially outperformed their benchmarks and we continue to see a virtuous circle at play. Companies making a product or service that helps alleviate a global sustainability challenge are seeing attractive profits and fund managers buying said companies are seeing attractive performance, which society and the planet should ultimately benefit from.

Some of our more cyclical themes such as battery technology, clean energy and robotics saw a significant bounce with more defensive areas like cyber security and cloud computing taking a pause for breath. We like all our themes because they target companies with growing opportunities, competitive advantages and business models that are not only well placed to survive short-term pressures but should resume their positive trends when the current crisis is over. From a diversification perspective it is pleasing to see them perform differently at different times.

We took the opportunity to add to a new sustainable theme we like at a more depressed price. The world is faced with the problem of not enough clean water in developing countries and poor infrastructure to transport it in wealthier economies. We added a position in one fund targeting clean water solutions, with a focus on utilities, engineering and technology companies. We see the incredible collaboration worldwide to develop the COVID-19 vaccine as a potential blueprint for solving more of the worlds growing challenges.
